

Social inclusion -strategies and practices from Nordic countries

Social inclusion is a crucial aspect of homelessness work and Housing First. This seminar looks at how inclusion is effectively promoted through urban planning, inclusive strategies, collaboration between stakeholders and community building. Examples from Odense (DK), Gothenburg (S) and Trondheim (N) show how we can create socially sustainable and well-functioning cities where all groups of inhabitants are included as full-fledged inhabitants of the city. Speakers will address social inclusion on the city level, neighborhood communities and collaboration around supported housing units.

Time: Wednesday 23th of April, 12:00-15:00 CET Time

Place: Teams
